

REMARKS

Applicant appreciates the time taken by the Examiner to review Applicant's present application. Applicant has amended Claims 1, 29 and 57 and added Claim 85. Applicant submits that no new matter has been added. Thus, Claims 1-85 are pending. This application has been carefully reviewed in light of the Official Action mailed July 5, 2007. Applicant respectfully requests reconsideration and favorable action in this case.

Rejections under 35 U.S.C. § 101

Claims 29-56 stand rejected under 35 U.S.C. § 101. Claims 29 and 42 have been amended. Applicant respectfully submits that this rejection is now moot.

Rejections under 35 U.S.C. § 103

Claims 1-84 stand rejected as obvious over U.S. Publication No. 2002/0061031 ("Sugar") in view of U.S. Patent No. 7,039,358 ("Shellhammer"). Applicant respectfully traverses this rejection.

In order to establish a prima facie case of obviousness, the Examiner must show: that the prior art references teach or suggest all of the claim limitations; that there is some suggestion or motivation in the references (or within the knowledge of one of ordinary skill in the art) to modify or combine the references; and that there is a reasonable expectation of success. M.P.E.P. 2142, 2143; In re Vaeck, 947 F.2d 488, 20 U.S.P.Q.2d 1438 (Fed. Cir. 1991). Applicant respectfully submits that the Examiner's prima facie case of obviousness fails at least because Sugar and Shellhammer (either alone or in combination) fail to disclose all the limitations of the rejected claims.

Claim 1, as amended, recites a method, comprising mitigating interference between piconets including: detecting interference between a first piconet and a second piconet; and ceasing transmission on a first set of bands wherein the first piconet ceases transmission by at least one of a plurality of devices on the first set of bands and the second piconet continues to utilize the first set of bands wherein at least the first set of bands is determined via coordination between the first piconet and the second piconet. Claims 14, 29, 42, 57 and 70 recite similar limitations.

Thus, embodiments of the present invention may allow piconets to communicate or otherwise coordinate to establish one or more bands on which each piconet will (or will not) transmit in order to mitigate interference between transmissions among devices in the piconets by allowing different piconets to transmit on substantially orthogonal sets of bands. (See, Specification at least at pgs 30-35). By determining and utilizing two substantially orthogonal sets of bands both piconets may, in one embodiment, continue to transmit simultaneously in a given time period.

Sugar, however, discloses a method for mitigating interference through holding off or delaying transmission of signal. (See Sugar, Paragraph [0058] [0071]). After reviewing the cited portions Sugar, Applicant respectfully submits that Sugar does not disclose any coordination between piconets to determine which bands will be utilized by each piconet. Thus, Applicant respectfully submits that Sugar does not disclose at least the limitation of Claim 1 which recites ceasing transmission on a first set of bands wherein the first piconet ceases transmission by at least one of a plurality of devices on the first set of bands and the second piconet continues to utilize the first set of bands wherein at least the first set of bands is determined via coordination between the first piconet and the second piconet.

Furthermore, after reviewing the cited portions of Shellhammer, Applicant respectfully submits that Shellhammer does not ameliorate the deficiencies of Sugar.

Accordingly, Applicant respectfully requests the withdrawal of the rejection of Claim , similar Claims 14, 29, 42, 57 and 70 and dependent Claims 2-13, 15-28, 30-41, 43-56, 58-69 and 71-84.

Conclusion

Applicant has now made an earnest attempt to place this case in condition for allowance. Other than as explicitly set forth above, this reply does not include an acquiescence to statements, assertions, assumptions, conclusions, or any combination thereof in the Office Action. For the foregoing reasons and for other reasons clearly apparent, Applicant respectfully requests full allowance of Claims 1-85. The Examiner is invited to telephone the undersigned at the number listed below for prompt action in the event any issues remain.
